

Virtual Dog Racing

The next generation of virtual dog racing is here

For dog racing enthusiasts, there's nothing like the thrill of watching a starting field of six to eight greyhounds at their peak. Now imagine them watching whenever they want, wherever they are, and on their preferred devices. And being able to place a bet at any time.

With Betradar's Virtual Dog Racing it's all possible. You'll be able to offer unique and exciting 3D racing simulations that are continuously generated and live rendered in the cloud, powered by Kiron Interactive – with fully responsive UI, optimised mobile and simple ewallet integration. All ensuring you can provide a truly interesting, realistic and authentic offer to your punters.
